Your Medical Center, respectively the Anesthesia Department of the Operating Room, has always been represented by a group of Anesthesiologists who are outstanding in their knowledge and efficiency at the operating table. Whoever was the first among M.D. Anesthetists to establish truly scientific methods to be used at the operating table, he surely succeeded in establishing a basis of knowledge in this particular branch of science, which gives the introducer of anesthesia the feeling that inefficiency due to lack of knowledge is an impossibility at the operating table of your Medical Center. Whoever is a resident of the University of Arkansas Medical Center comes out as an expert in Anesthesiology.

## *Just a Word About Our Professional Planning*

Our Planning Department is always glad to offer planning suggestions to you without obligation or expense. Through more efficient planning of your office, you may be able to effect a saving in rent and a consequent reduction in "overhead." By more wisely using the office space available you may be able to change the entire character of your office to such an extent that your clientele and your earnings will be substantially increased. In establishing your new office, it is best to begin with the finest equipment. Fine furniture lasts a lifetime, commands the respect of your patients, and in terms of service years it is cheaper. We make it a part of our business to know where the better locations are. Stover Location Data Service is always available to you.
